15% White Dutch Clover

50-Cal Alfalfa = 16%

Alfalfa Provides Protein For
Larger Antlers!
This Elite Alfalfa Variety Has
The Best Winter Hardiness In
Its Class. High Resistance To All
Major Alfalfa Diseases, Excellent
Grazing Tolerance With Faster
Recovery Time. Works Best
When Soil Has A 6.2 Or Above
pH At Seeding Time.

Kenland Red Clover = 15%

This Perennial Clover Has A Longer
Growing Season Than Any Other
Clover Grown In The US. Improved
Resistance To Northern And Southern
Anthracnose. Provides A Good Source
of Protein For Healthy Growth.

Small Burnet = 8%

Excellent Forage For Deer During All
Seasons! It Stays Green Throughout The
Growing Season And Into Winter. A Long
Lived Evergreen Perennial Producing A
Flower. Full Flowering Should Not Be
Expected Until The Second Growing
Season.

Seed This Mixture In Aug-Sept Or Jan-April
Using 10 Pounds Of Seed Per Acre.

This Mixture Works Best On Well Drained Soils
Full Sun Or Semi Shaded Areas.
